THE ULTIMATE SPA EXPERIENCE

2025

Fiber-Tech™

T E C H N O L O G Y

Designed for comfort. Engineered for durability.

Innovative Fiber-Tech™ Technology offers superior structural stability while maintaining a comfortable surface for a luxurious and refreshing spa experience.

PureSpa™ ADVANTAGES

Durable Fiber-Tech™ Technology

Built-In Hard Water Treatment System

Heated Air Bubble Technology

Durable Exterior

Puncture-resistant 3-ply laminated material

U.S. Patent No. 8,562,773

Fiber-Tech™ Technology provides the ultimate comfort and support.

Top & Bottom Layer:
Embossed heavy-gauge PVC

Middle Layer:
Super-strength reinforced polyester mesh

Hard Water Treatment System

Built-In Hard Water Treatment System makes water gentler on skin, clothes and the entire spa system.

The system generates an electromagnetic field that agitates calcium and other minerals in the water, causing them to create suspended crystals.

The suspended crystals of hard water elements are retained in the filter cartridge, leaving soft water in the spa.

Hard water buildup limits water flow and reduces the life of your spa.

Powerful & Safe Heating System

The Positive Temperature Coefficient (PTC) heater is designed to maximize heat transfer to the water, while ensuring the highest level of safety, performance and longevity.
